EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Taylor on 7/21/2005.

The application has been amended as follows:

On lines 4 and 6 of claim 1, --crude-- has been inserted before "substituted".

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose a process as called for in claim 1 during which a crude phenyl alkanol or crude substituted phenyl alkanol is fed to the dehydration step of step (b). As defined in the specification on page 2, line 23 thru page 3, line 2, namely page 4, lines 17-28, a "crude" phenyl alkanol or "crude" substituted phenyl alkanol contains heavies having molecular weight of 195 or higher. This crude stream containing heavies is directly fed to the dehydrating step. The closest art -Dubner et al - clearly teaches a process having a step of removing heavies before the dehydration step (see the figure; col. 4, lines 58-65). Therefore, the feed of the dehydration step of Dubner does not contain heavies. One having ordinary skill in the who studies the specification, namely examples I and II would recognize that the claimed process is not obvious from the Dubner teachings since a process with removal of heavies before the dehydration produces more heavy residue than a process without removal of heavies before the dehydration. Further, as recognized from the examples, to obtain a pure styrene, and because of the production

of heavies in both steps, the prior art must require 2 steps of removal of heavies before and after the dehydration, the claimed process requires only one step of removal of heavies after the dehydration. This reduces the cost of purification of the final product.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.
